Lighting Design: Filippo Cannata
Lighting Design team: C. Masone
Completed: 2000

In this project light is conceived by contrasts: distribution spaces characterized by cold tones (white, lime green and blue) clash with internal rooms illuminated by warmer tones (red and brown). The room for the plenary assembly is characterized by long white curtains which are conceived to be a filter as regards the walls and to serve as diffuser of natural light coming from the high band windows. The littler meeting rooms offer a warmer space with a comfortable and reassuring light.
