The Inet Spa British Telecom WEB HOSTING I.S.P. (Internet Services Provider) realized its General Quarters in Settimo Milanese (MI). The lighting design project expresses at its best the architecture of the spaces and the potential of design. Light exalts the power of colour, primary and pure, exalts the authenticity of the employed materials, the sinuosity of shapes and cuts. These detail were unified in a new relation made of glazings and contrasts, openings and walls, calculation and grace. In each room light plays with material and with its different shades by turning the space in a pleasant harmony.
