In this project light gives to the fellow guests sensations rich in sensuality and welfare; it is like a nest where they can gather and tell loving words. The interiors speak to the body and mind a language rich in emotional tension. The different feelings that each alcove is able to stir up are due to the fabrics plots and the shadows of the objects on the stained walls. The soft light of the candelabrum increases their charm and creates an atmosphere made of slight contrasts whose the shadows fascinate us deeply.
