**Lighting Design team:** N. Fiorillo  
**Completed:** 2010

In Marina del Cantone, in the bay of Nerano (Sorrento) between Capri and Positano, "Quattro Passi" Restaurant, surrounded by the Mediterranean vegetation, embellishes the scenery of a landscape characterized by a beauty which has no equal. On the terrace overlooking the sea, lying on the comfortable wicker chairs, surrounded by light woods, by decorated ceramics and sophisticated tableware with the gentle lapping of the waves in the background it is possible to enjoy a state of total well-being. Our lighting design project helps to give an extra touch of magic in this fairy-tale atmosphere, making the dining experience unique and charming. The matter reigns in the pot, it shines in the flavours, it is exactly what appears to our eyes and smell under our noses, softened by light reflections, the form corresponds luxuriously to the taste and the taste is cleverly emphasized by a light which caresses the senses. Light promotes synaesthetic experiences, of real complex and multidimensional perceptual storms where scents, sounds and colours act like echoes by creating fleeting images that have the taste of the dream while being awake.
