**Completed:** 2001

The definite red carenaturas, quilt of stars of the building, enters in dialogue with the real sky, both of them are perfectly legible, there are no interferences or overlaps thanks to a careful use of the light which is conceived to not increase the existing bright pollution. Each respects its own role, the building shows himself and its own function of lantern; the sky, tolerant with this vivacious competitor, accompanied by the stars makes a beautiful show of itself.
